

BAG-IN-BOX PACKAGING SOLUTIONS

LIQUI-BOX 6000

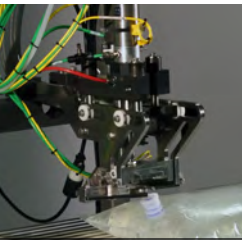

LIQUI-BOX
DESIGN. CONNECT. DELIVER.

Since the early 60's Liqui-Box has been pioneering bag-in-box technology in industries such as beverage, dairy, food, industrial fluids and many others. Discover how Liqui-Box can deliver outstanding bag-in-box solutions for you with our comprehensive portfolio of fillers, fitments, films and high quality customer service.

APPLICATION SPECIFIC BAG-IN-BOX SOLUTIONS

GO GREEN WITH BAG-IN-BOX

Our recyclable dairy film reduces waste, handling charges, and reduces disposal volume compared to other packaging options.

FILLERS

- A wide range of fillers able to package your liquid products in sizes ranging from 1 to 370 gallons (3.8 to 1400 liters).
- Diverse filler offering to suit your specific application.
- High quality technical assistance globally.
- Maintenance and spare parts programs designed for specific fillers and applications.
- Specialized training for operators and maintenance personnel.

FITMENTS

- We offer dispensing solutions that meet conventional, ESL, aseptic and many other product applications.
- In-house development of fitments and connection systems, designed and manufactured to meet precise application requirements.
- Outstanding performance and reliability ensure your product is protected from filling to dispensing.

FILMS

- Our high quality film structures deliver outstanding protection while preserving the quality and integrity of your product.
- Aseptic versions save refrigeration cost before the bag is opened.
- Superior barriers for light, oxygen, and contamination.
