LIQUI-BOX
FLIP-N-SEAL
SYSTEM

CONNECT AND PRESERVE
Introducing Flip-N-Seal, the most convenient, re-sealable dispensing system in the liquid food market today.
FRESH MADE EASY

Connecting your customers to your products has never been easier with the Flip-N-Seal fitment series. The Flip-N-Seal rescaling technology makes using your products quick and easy and also provides the option to reseal and preserve your products for later use.

FEATURES & BENEFITS

• Available for Clean Fill, Extended Shelf Life, and Aseptic applications.
• Safe and sanitary system, allowing you to connect your product without removing a cap and exposing the product inside.
• The convenient pull tab on the fitment makes connecting to dispensers quick and easy. The resealable design allows you to easily disconnect the system for cleaning, while maintaining the product integrity inside the package.
• Compatible with all industry standard dispensing systems through a 1/2” outer diameter connection. We also provide two types of probes to make connecting to your product easy for your operation.
• Fill and dispense through a single spout bag, instead of a costly double-spouted bag.
• Increase the oxygen barrier of your package by eliminating pre-attached tubes, extending the product’s shelf-life even longer.

FLIP-N-SEAL ASSEMBLIES

Adaptable to virtually all filling and dispensing systems for bag-in-box packaging, the Flip-N-Seal allows your customers to get connected with no hassle and no mess while maximizing the performance and value of the package. Flip-N-Seal is perfect for Clean Fill, ESL or Aseptic markets everywhere.

A WINNING CONNECTION

Simply put, Liqui-Box’s Flip-N-Seal fitments provide a cost-effective and easy set up solution for end users when dispensing premium products like Frappes or Smoothies. This no-hassle, no-mess, approach is a win-win for all.

We’d love to connect with you online, over the phone, or in person to provide more information on the Flip-N-Seal and all other products and services we offer.
