

At Liqui-Box we know good service matters. That's why our dedicated customer focused service organization delivers proactive service globally with responsive highly skilled teams that keep your fillers operating at peak performance day in and day out.

LIQUI-BOX ADDS VALUE IN FOUR KEY WAYS

INSTALLATION AND TRAINING

We offer on-site installation of your Liqui-Box equipment with our specialized support team to ensure your production is up and running as quickly as possible. Our experienced team also provides on site training programs to keep your operation and personnel at peak efficiency.

SCHEDULED MAINTENANCE

Our scheduled programs maintain your equipment and keep your production running. By maintaining your equipment according to best practices, production flow is secured and costs are minimized.

REACTIVE SERVICE

If production stops, revenue stops. We move quickly and efficiently to get you back on line.

ASSET OPTIMIZATION

We help to ensure your entire production line, from the box erector to the palletizer, is operating at the highest possible efficiency, which helps maintain the low production costs.

HOW WE PROVIDE VALUE

Our qualified service technicians bring years of industry know how to each project and specialize in bag-in-box, vertical form fill and seal, and bottle filling equipment. Our team has expertise in conventional, extended shelf life and aseptic filling technology and use this knowledge to ensure your filler is properly configured for your products. With this focused industry knowledge, you can be confident that our technicians will deliver the individualized support you need for all of your filling equipment.

Our spare parts group provides the parts and documentation needed to ensure you have everything you need to keep your production going. If a problem does arise you can rest assured that we can be reached quickly on our customer support line and will work to answer any question you may have quickly and efficiently.

CUSTOMER SUPPORT

We're dedicated to delivering expert customer support over the phone and online.
