WHO BENEFITS?

Our packaging offering delivers specific benefits to customers in a variety of industries including institutional, education, restaurants, hospitality and healthcare.

SAFE, CONVENIENT CONNECTION

Developed specifically to be a superior alternative to current industry offerings, our fitment and connection system delivers safety and security for dispensing cleaning chemicals, detergents and other non-food liquids. The left handed threads ensure the connector isn't accidentally attached to the wrong product and the different colors can be used to visually represent a variety of formulas.

FILLERS

Our range of fillers includes value-driven systems such as the fully automatic model 1500. This filler feeds a strip of bags into the filler, separates the bag about to be filled and fills the bag all in one continuous output cycle.

INNOVATIVE PACKAGING SOLUTIONS FOR CONCENTRATED CLEANING SUPPLIES

Included spray bottle refillable multiple times, saving time and money.

1.5G bag-in-box compartment for concentrated cleaning solutions.

Convenient dispensing tap for quick easy refills.

CUSTOMIZED FILMS

Liqui-Box offers a wide range of film structures with important features such as flex-crack, puncture and tear resistance. **All our chemical bags meet superior quality standards and are available in bag-in-box sizes ranging from 1 to 6 gallons (4 to 23 liters) and bulk applications up to 300 gallons.**

WHY USE BAG-IN BOX?

Our packaging solutions include benefits over traditional rigid packages that add value for you, your employees and your bottom line!

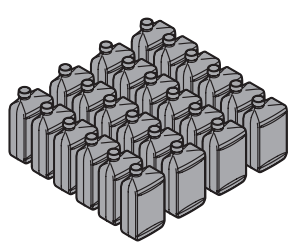

PRECISE DOSING - Our packages work seamlessly with many industry standard dosing systems ensuring that the right amount of your product is used every time!

SAFETY - Our closed system packages help to prevent unwanted contact with cleaning solutions and other chemical products which keeps your employees safe.

DISPENSING VERSATILITY - Our variety of fitments and connectors ensure we have the right dispensing solution for your product and application!

1 QUART PLASTIC BOTTLES (X24)
1.8oz of plastic per bottle (x24)
