

# COFFEE & TEA INDUSTRY

Discover fresh convenient  
packaging designed specifically  
for your coffee and tea products  
from Liqui-Box.

 **LIQUI-BOX**  
DESIGN. CONNECT. DELIVER.

# REFINED PACKAGING FOR **COFFEE AND TEA**

Coffee and teas are growing in popularity and variety and as demand grows we have the packaging solutions to support your product and sustainability goals. Our bag-in-box packaging and filling solutions reduce waste, maximize storage efficiency and most importantly **preserve your products' quality and flavor.**

## VERSATILE SIZES & CONNECTION OPTIONS

Bag-in-box delivers convenient packaging options in a range of sizes from 1.5 liters and up. Compact, easy to carry bag-in-box solutions are perfect for sporting events, parties and outdoor activities such as picnics, camping trips and backpacking. Larger format bag-in-box delivers convenient dispensing and connection to industry standard dispensers for cafe and food service applications.

## BAG-IN-BOX TECHNOLOGY

Our films, fitments and fillers are designed to integrate seamlessly together to deliver a complete packaging system that ensures your products are protected from oxygen and other contaminants. This comprehensive approach to packaging ensures your products are protected from filling through transportation to consumption.

Our bag-in-box solutions keep your coffee, teas, dairy products and flavor shots fresh longer, allowing your customers to enjoy your products the way you intended.

**Convenient filling, packaging, and dispensing that add value to your operation.**

## CONVENTIONAL, ESL & ASEPTIC FILLING OPTIONS

## FILLERS

Our bag-in-box packages are compatible with a variety of both semi and fully automatic filling processes which ensures Liqui-Box has an equipment solution for your production scale.

# OPTIMIZED OXYGEN BARRIER FILMS AND CONVENIENT DISPENSING TAPS.

## ADVANCED PACKAGING

**Our specialized bags meet superior quality standards and are available in sizes that meet virtually any application.**

Our packaging is optimized for the processing and filling applications needed to deliver high quality, fresh and natural coffees, teas, flavorings and dairy products.

## PASTEURIZED

Liqui-Box bags are made of FDA-certified resins specially designed for contact with coffee, tea, and other products used in the industry.

## EXTENDED SHELF LIFE (ESL)

Liqui-Box ESL keeps your product in ideal conditions longer by filling inside a sterilized chamber.

ESL bags meet the same standards as are made of FDA-certified resins and meet superior quality standards. Our ESL bags are sterilized through gamma irradiation at a minimum of 1.5mRad.

## HOT FILL

We offer bags and fitments that allow for hot fill and extreme hot fill processes and preserve your product integrity.

## ASEPTIC

Our bags are made of FDA-certified resins and are available in clear and metalized film structures that offer tailored barrier properties for each application and product type.

## FITMENTS

Liqui-Box offers a variety of dispensing taps for in-home use or connection to bar dispensers. In addition Liqui-Box also provides expertise in industry specific dispensers and applications.

Liqui-Box innovates to fulfill global liquid packaging needs with reliable and sustainable solutions that protect your liquid assets and propel your performance and productivity.
