

Urn-liners

Urn-liners are disposable and hygienic liners used in fresh brewed iced beverage dispensing urns. Urn-liners provide quality and operational improvements for liquid dispensing at dine-in restaurants, quick service restaurants (QSR) and convenience stores. They are the ideal hygienic solution for iced teas, iced coffees, lemonade, fruit drinks and more.

A hygienic solution

Urn-liners are easy to install and use with a changeover process taking less than one minute. They eliminate the need for disassembly and reassembly of the spigot for daily cleaning and maintenance. Additionally, the use of urn-liners provides consistent high quality and better tasting product free from cross contaminants.

Your first cup of tea sold pays for the liner.

Improve quality, food safety and taste of freshly brewed iced beverages with urn-liners

Features and benefits

The use of urn-liners provides a number of quality and operational benefits:

Food safety

- Reduces microbial contamination concerns from urn or spigot
- Prevents cleaning chemical residue in iced beverage

Product quality

- Reduces cross contamination of flavor from the metal urn to the beverage

Operational efficiencies

- Reduces the need for daily cleaning - one liner lasts 24 hours
- Improves urn, spigot and wrap life due to reduction in damage while cleaning
