

Our policy regarding the **safety and security of food containers and packaging** is based on supplying products that meet the needs of our customers in terms of quality, price, safety and security. To achieve this, we follow a process of continuous improvement that guarantees the future and development of the company, understanding that this is the only method capable of maintaining and even improving the position we occupy today in the market.

LIQUI-BOX SPAIN, S.L.U. is engaged in the manufacture of flexible plastic packaging for liquids, heat sealing and cutting of multilayer bags for Bag-in-Box applications in the food industry. In some cases, irradiation process is carried out by an external company. Our efforts are focused on improving the sustainability of our products, developing packaging that is even more recyclable and uses less raw materials without compromising its properties.

Due to the commitment of LIQUI-BOX SPAIN, S.L.U., with the safety of containers and packaging, we have developed a Management System for the Safety and Security of containers and packaging based on the **BRC/Packaging PROTOCOL**; due to this commitment, our principles regarding the quality and safety of food containers and packaging are as follows:

- To provide our product with the highest level of **quality, safety and security** of containers and packaging for food contact.
- Establish a formal **commitment** of the **whole company** and especially of its **Management** to achieve continuous improvement of the SGISEEA and compliance with all the requirements of the ISO 22000:2005 standard and the BRC/Packaging PROTOCOL, as well as with the legal and regulatory requirements applicable to the company.
- To involve all LIQUI-BOX SPAIN, S.L.U. personnel in the **development of the SGISEEA** and in the **fulfilment of our Policy** and the established **objectives**, at all relevant levels of the organisation.
- To be **committed to our clients**, providing solutions according to their different needs thanks to personal advice from the very beginning.
- Ensure the **compatibility of containers and packaging with the product** with which they will come into contact.

In addition to these criteria, we consider key elements:

to know the needs and expectations of our clients, in order to **guarantee** their complete **satisfaction**.

- satisfy the requirements and continually improve the **effectiveness of the quality system**.

develop and train the whole organisation in a **quality culture**.

communicating and getting the **policy** across within the company.

providing a framework for setting and reviewing **quality objectives**.

implementing a process of **continuous improvement** throughout the company.

to offer **competitive products** on the market through high quality, cost-effective and clean industrial processes.

-provide adequate means and resources for the achievement of our objectives.

Management is committed to review this Policy annually and to make the necessary modifications to the EMISEEA to ensure that its compliance with legal requirements is maintained, the food safety of containers and packaging is maintained and the effectiveness of the System is improved.
