

	<h1>FOOD SAFETY AND SAFETY POLICY</h1>	PISEEA
		Issue 2 Revision 9
		07/04/2026

Our policy regarding **Food Safety and Product Safety** is based on supplying products that meet customer needs in terms of quality and price, while also being safe and suitable for consumption. To achieve this, a continuous improvement process is followed to guarantee the future and development of the Company, understanding that this is the only method capable of maintaining and even improving the position it currently holds in the market.

LIQUI-BOX SPAIN, S.L.U. is engaged in the manufacture of flexible plastic packaging for liquid and semi-liquid products, through thermal sealing of its individual components for Bag-in-Box applications in the food industry. In some cases, the product undergoes an aseptic process through subcontracted and/or outsourced irradiation. We offer customized solutions for developments in plastic materials applied to direct and promotional marketing. Our efforts are focused on improving the sustainability of our products and services by developing packaging that is more recyclable and uses fewer raw materials, thereby reducing environmental impact without compromising physicochemical properties. In this context, **LIQUI-BOX SPAIN, S.L.U.** integrates climate change-related **risks and opportunities into its risk analysis processes**, business continuity planning, and strategic planning.

As part of its commitment to food safety, **LIQUI-BOX SPAIN, S.L.U.** has developed and implemented a Food Safety and Product Safety Management System based on the **BRCGS PROTOCOL, in its latest available version**. In line with this commitment, our principles regarding product Quality and Food Safety are as follows:

- To provide our products with the highest level of **quality, food safety, and product safety**.
- To establish a formal commitment from the **entire Company**, and especially from **Management**, to achieve continuous improvement of the Food Safety and Product Safety Management System and to comply with all the requirements of the BRCGS PROTOCOL, as well as all applicable legal and regulatory requirements relevant to our activities and sector.
- To involve all **LIQUI-BOX SPAIN, S.L.U.** personnel in the **development of the Management System** and in **compliance with our policies** and established objectives, at all relevant levels of the organization.
- To be **committed to our customers**, providing solutions aligned with their different needs through personalized consulting from the very beginning of commercial relationships.
- To ensure the **compatibility** of our products with their **final application and use**.

In addition to these criteria, we consider the following key elements:

- Understanding the needs and expectations of our customers to **guarantee** their complete **satisfaction**.
- Meeting requirements and continuously improving **the effectiveness of the Quality Management System**.
- Developing and training the entire organization in a **culture of quality** and food safety. Creating a results-oriented culture involves taking quality, safety, and requirements into account in every situation and circumstance.
- Communicating and ensuring understanding of the **Policy** throughout the Company.
- Providing a framework for establishing and reviewing **Quality objectives**.
- Implementing a **continuous improvement** process throughout the entire Company and in product quality and safety.
- Offering **competitive products** in the market through high-quality, profitable industrial processes that are respectful of the environment.
- Providing adequate means and resources to achieve our objectives, always placing the customer at the center of our activities.
- Manufacturing safe products that comply with established specifications in an efficient manner.

Continuous monitoring will be carried out through the assessment of customer satisfaction, analysis (root cause) of complaints, R&D process data, production data, and other KPIs established by Management.

Management commits to reviewing this Policy annually and to making the necessary modifications to the Food Safety and Product Safety Management System to ensure that it remains up to date and appropriate to legal requirements and customer needs.

LIQUI-BOX SPAIN, S.L.U.,

 Plant Manager Madrid, 07/04/2026
